Ocean: A Photocular Book

Synopsis

A New York Times bestseller, *Ocean* is like being on a dive. Using Photicular technology, each image is like a 3-D movie on the page, delivering a rich, fluid visual experience. Open the book, and the reader is swept into the magic of an underwater world, face-to-face with a floating Yellow-Banded Sweetlips; with a glow-in-the-dark Deep-Sea Anglerfish; with a Sea Horse swaying in balletic motion; with a Sand Tiger Shark gliding along the ocean floor, its gaze haunting, its hook-toothed mouth gulping open and closed. The text by Carol Kaufmann enchants with its descriptions of coral reefs; a journey on Alvin, the 17-ton submersible; and a meditation on our oceans. Then, for each creature, she writes a lively and informative essay, along with vital statistics—size, habitat, range, diet, and more. The Photicular process uses an innovative lenticular technology, sliding lenses, and original four-color video imagery. The result is like a movie in your hands—the dance of life in a book.

Book Information

Age Range: 3 and up

Series: Photicular

Hardcover: 28 pages

Publisher: Workman Publishing Company (October 7, 2014)

Language: English

ISBN-10: 0761180516

ISBN-13: 978-0761180517

Product Dimensions: 2 x 8.2 x 8.5 inches

Shipping Weight: 1.9 pounds (View shipping rates and policies)

Length: 0:56 Mins

Here's a short video of what this book does. It has pictures that "move" when you flip the pages and each page also has text that describes the animal in the picture. I bought this to give to my

5-year-old niece for a Christmas present and I think she's going to love it. Note that you can't watch the video on mobile devices.

This book is only 7 "pages"...not sure I would have bought it had I known that

This book is awesome! As both a parent and a children's library assistant, I would highly recommend this book. The pictures are great and the text gives a lot of information. When reading this to younger children I only read some of the text or I make up my own story with funny voices. The kids love when the pictures "talk". I just bought this book because my 6 year old son absolutely loves it but it was due back at the library. He asks me to do the voice for the eel every night before bed. That picture is really funny because the eel's mouth moves so you can really make it seem like he's talking. It cracks my son up every time!

Great Book! Brought this for my Mom and Dad, who are pretty much housebound due to their age. Dad was an amateur photographer so he really enjoyed it. It made my Mom smile. She's been ill for some time, so anything I can do to brighten her spirits is a good thing. I also bought the Photocular book SAFARI, which is out now, and pre-ordered POLAR, which should be out soon...This book is great for all ages!

This is such a fun book! I purchased it to give to my 7 year old niece for Christmas and when she opened it up and began turning the pages she was so excited! She loved that she could make the animals move faster or slower by how she turned the pages. Just enough information provided on each animal presented to briefly satisfy then ultimately send a person on to more in-depth sources. My sister-in-law is a teacher and plans on using it for her class and suggesting it to other teachers as well. Where were books like this when I was a kid? It's truly a visual treat. I might have to visit my niece more so I can also visit the book!

This item was purchased as a Christmas gift for a young Great Grand Child. We won't know how he likes it until after Christmas, but he is a real smart little guy and loves to experience and study things around him. This should really keep him captivated. It looks like a very good quality book. The way the marine animals move should really interest him.

The photocular books in this series are some of the COOLEST books you've have EVER seen. I

have both the Oceans book and the Safari book, and they blow me away every time I open them. I show all of my family and friends every chance I get, and I have purchased them as gifts for people as well because I think they are just so neat!!! The books are really well made as well and definitely worth the price (even if it seems a little high!) Trust me, you have never experienced a book like this before.

FANTASTIC!!! This was a gift for my 4year old granddaughter. She loved it from the moment she opened the page. The book offers great insight to many common oceanic creatures. The photiclar-pictures are amazing lifelike. The book will offer every child an adventure into the deep blue ocean.
