## Customer Reviews

Let me start with the fact that I can't love this book more than I already do and am giving it 5 stars with 2 thumbs way up. Jessica Hische has taken practically (I'll come back to that word again later) everything she knows about lettering and typography and put it into this book. It is distinctive from other books written by designers merely showing off their work. It gives equal weight to process development as well as final product, as she shares her thoughts and guidance along the way. It's definitely Jessica's own voice coming through in an intimate conversational way, like one-on-one mentoring. She shares her design history in great detail without arrogance or dryness, and is practical in the flow of writing and content. She is frank, passionate and thoughtful about her process that it's hard to find any fault at something that is achievable IF like Jessica, you really push yourself and over-deliver. There's plenty of WHAT and HOW, but more importantly, more of the WHYs, explained with clarity, confidence and encouragement. This is

particularly valuable for novice letterers who feel intimidated at the prospect of taking the handlettering plunge. Take this example of RESEARCH & BRAINSTORMING: "Proper research alleviates a lot of anxiety at the start of a projectâ€”the more confident you are in your understanding of the subject matter, the less worried you will be about your ability to come up with solid concepts.â€” This 176-pg hardcover book is beautifully designed, and well-considered in her approach of each spread. (Although there are some stray typos throughout and a shame there isn't a type colophon for the fonts used).
