## Customer Reviews

I use both Volumes 1 and 2 with my 40+ middle and high school trombone students, and I've found the Beeler books to be more complete than any other set of method books available. All well-written etudes, duets, and exercises! Ignore the negative votes -- those were people who sent the wrong books and apparently wanted to blame Walter Beeler, who died decades ago!

This book fills the need for my practicing technique

I also believed I was ordering Book 1, but received Book 2. Eventually my son will be moving into Book 2 so I'll hang on to it, but now I have to try to find a copy of Book 1 for lessons we've already started. The description needs updated to clearly reflect which book you are really getting. Nothing wrong with the book itself - just not what is advertised as being sold.

The Beeler books are good method books, but when I ordered this item, I got Book Two, rather than the Book One that is pictured above. Who knows whether this is a one-time or systemic error?

Years ago, I had ordered Bk I for trombone and got book 2. very inconvenient!! I had ordered about 8 of them. I see they haven't fixed this issue. Better be safe and order from somewhere else.
