This THINGS COME APART 2015 WALL CALENDAR is right up my alley, because I’m a confirmed gadget junkie who loves teardown videos and seeing how things are put together. The big monthly photos of artistically arranged mechanical parts are fun, because you can’t always guess what the assembled object is from these photos.A nice feature that is easy to miss in the product page photos is the small photo of each monthly object’s parts, laid out in orderly rows and columns, that appears at the lower right on each "Month" page. The Month pages themselves are laid out cleanly, with simple typography, and with enough space under each numbered "Day" for writing in a few appointments or notes. The Month pages include mini-calendars for the previous month and next month, and also indicate standard U.S. holidays.POSSIBLE SPOILER ALERT: The 2015 calendar includes teardowns of the following objects:flip clock, telescope, Swiss army knife, accordion, rotary telephone, children’s wagon, toaster, bicycle, smartphone, record player, chainsaw, typewriter, and snowblower.

I love taking things apart, so this was a no brainer. I just wish he had put the photo that shows all the parts neatly laid out and counted in a little larger space, though the "blown-apart" photos are awesome as well.

I really didn’t like this calendar due to the images inside. It was a very unique concept but when you see the images up close, they look cheap and not of high quality.This might be perfect for someone’s garage or casual living space. I was trying to use it in my office cubicle which it just didnt work for me personally and I found myself tired of the images.

This is such a great gift for that person who used to take things apart as a kid... Or a kid who likes to take things apart. Maybe it will stop them from pulling apart your alarm clock, then again it may just encourage them...

My husband is a maintenance man and loves to take thing apart and fix them, so this was the perfect calendar for his shop at work. I hope they have it again next year.
